

Notwithstanding any other considerations, Pacific Rim Wood Ltd. and P.T. Kutai Timber Indonesia have a vested interest in ensuring the sustainability of the raw materials used for the manufacture of FLAMEBREAK™ door cores and are strong supporters of the FSC (*Forest Stewardship Council*).

P.T. Kutai Falcatta plantation

FSC Meranti

FSC Kamarere

The primary species used for the manufacture of FLAMEBREAK™ is Falcatta which is a fast growing light weight plantation hardwood grown in forests that are either owned or managed by P.T. Kutai Timber Indonesia. Other species used in the manufacture of FLAMEBREAK™ (*and other P.T. Kutai timber products*) include plantation grown Radiata pine from New Zealand, Meranti from Indonesia and plantation grown Kamarere from Papua.

FLAMEBREAK™ cores are available with full FSC certification and with chain of custody records from plantation through to the factory finished product.

Raw materials used in the manufacture of FSC Certified FLAMEBREAK™ are obtained from FSC accredited sources audited by:

- Exova BM TRADA
- Soil Association Certification Ltd.
- The Rainforest Alliance
- SmartWood

P.T. Kutai plantations and the manufacturing plant meet the requirements of FSC-STD-40-004 (*Version 2.0*) EN and FSC-STD-40-005 (*Version 2.1*) EN for Chain of Custody Certification with audits carried out by Exova BM TRADA.

P.T. Kutai Timber Indonesia meets the Environmental Management System requirements of ISO 14001 : 2004 and is registered within the Exova BM TRADA certification scheme to this effect.

In addition the P.T. Kutai factories operate ISO 9001 : 2008 quality control systems audited by Exova BM TRADA providing for confidence with regard to the consistency of the FLAMEBREAK™ product and full traceability, where required from sapling through to the FLAMEBREAK™ door core.

15.2 FSC Certified FLAMEBREAK™

FLAMEBREAK

FSC Flamebreak™ is supplied with the support of a complete forest to work shop chain of custody.

FSC FLAMEBREAK™ Plywood faced door blanks satisfy specification requirements for labelling as a 100% FSC product.

- 4mm Plywood - FLAMEBREAK™ 430
- 6mm Plywood - FLAMEBREAK™ 630
- 6mm Plywood - FLAMEBREAK™ 660

FSC FLAMEBREAK™ MDF faced door blanks satisfy specification requirements for labelling as a FSC MIX product.

- 6mm MDF - FLAMEBREAK™ FF630
- 6mm MDF - FLAMEBREAK™ FF660

CERTIFICATE OF REGISTRATION

This is to certify that

PT Kutai Timber Indonesia

Jl. Tanjung Tembaga Baru,
Pelabuhan Probolinggo,
East Java,
Indonesia

has been audited and found to meet the requirements of standard(s) FSC-STD-50-001 (Version 1.2) EN and FSC-STD-40-004 (Version 2.1) EN for FSC® Chain of Custody Certification

Scope of certification

Manufacture and sales of plywood, door blank, solid wood board, glued laminated timber and particle board made from FSC certified timber and sales of FSC certified round wood

Products:

Plywood
Doors and door frames
Solid wood board
Glued laminated timber
Particle board
Round wood

Certificate number: TT-COC-002009

Issue number: 2016-01

Certificate start date: 10 January 2015

Certificate expiry date: 9 January 2020

Date of initial certification: 10 January 2005

Forest Stewardship Council®
FSC® United Kingdom

What is the Forest Stewardship Council (FSC)?

So many things in our lives come from forests. FSC helps take care of forests and the people and wildlife who call them home. So you can keep your life full of forest products while keeping our forests full of life.

Why are forests important?

Forests are good for us. They provide a great environment for hiking and other outdoor pursuits and are even proven to have therapeutic properties. Millions of indigenous people and countless species of plants and animals are wholly dependent on forests. Trees produce oxygen and in the process store carbon dioxide, meaning that forests are our planet's best defence against climate change. Forests also provide many products that we use every day from timber for furniture and construction to paper for books and tissues and even foods and important medicines.

What's the problem?

Forests are under threat and disappearing at an alarming rate. Deforestation accounts for more greenhouse gas emissions than the global transport sector. Finding a balanced way to both use and protect our forests has become critical.

How can FSC help?

FSC is an international, non-governmental organisation dedicated to promoting responsible management of the world's forests. FSC has developed a system of forest certification and product labelling that enables people to identify responsibly sourced wood, paper and other forest products.

How can I help?

Choose FSC certified products whenever you can. Look out for the FSC labels on paper, timber and other forest products including cork, bamboo and natural latex. For unlabelled products, such as sawn timber, choose an FSC certified supplier.

How does it work?

FSC runs a global forest certification system with two key components: Forest Management and Chain of Custody. The certification process is carried out by independent organisations called certification bodies, which assess forest managers and forest products companies against FSC standards.

What makes FSC forests special?

FSC certified forests must be managed to the highest environmental, social and economic standards. Trees that are harvested are replanted or allowed to regenerate naturally. The forests must be managed with due respect for the environment, the wildlife and the people who live and work in them. This is what makes the FSC system unique and ensures that a forest is well-managed, from the protection of indigenous people's rights to the methods of felling trees. FSC is the only forest certification scheme endorsed by WWF, Greenpeace and the Woodland Trust.

What do the labels mean?

An FSC label on a wood or wood based product is your assurance that it is made with, or contains, wood that comes from FSC certified forests or from post-consumer waste. FSC labels can also be found on some non-timber forest products.

FSC 100%

All the timber or fibre in the product comes from an FSC certified forest.

FSC Mix

The timber or fibre in the product is a mixture of some/all of the following:

- Timber/fibre from an FSC certified forest
- Reclaimed timber/fibre
- Timber/fibre from other controlled sources

FSC Recycled

All the timber or fibre in the product is reclaimed material.

Where can I find FSC certified products?

You can find the FSC labels on garden furniture, decking, sheds, conservatories, tools, bird boxes and bird tables, kitchen, bathroom and general housewares, brushes, wall paper, flooring, doors, shelves, furniture, toilet tissue, paper, books, pencils - in fact most things made from wood! It can also be found on other forest products including essential oils and natural latex. DIY stores such as B&Q and Wickes stock FSC products. You can also find FSC certified products and packaging on the high street in stores such as Marks & Spencer, Sainsbury's, John Lewis, and The Co-operative and from many independent retailers.

How do I know if it's FSC certified?

Look for the FSC label on the product or packaging (remember that the packaging itself can also be FSC certified) or source from an FSC certified company. Every FSC label contains a unique license code. FSC certified companies should state which products are FSC certified and include their unique FSC certificate number on their invoices. FSC license codes and certificate numbers can be verified using the FSC certificate database at info.fsc.org or by contacting the FSC UK office.

What should I do if you can't find FSC certified products?

Although more and more FSC certified products are available all the time, there are still gaps in the market. If you cannot find a product you should ask for it; the greater the demand, the bigger the supply. The FSC UK office can also help to identify suppliers of specific products.
